

*R. Ephemerides.*

RIVERS.  
AN <sup>58. h. 35</sup>  
ALMANACK  
for the yeare of  
our Lord Christ  
M D C X L.

Being the Bissextile or Leap-yeare: and since  
the creation of the world 5589.

¶ Calculated for the famous Univerſitie and  
Town of *Cambridge*; and may generally  
ſerve for the whole iſle of great *Britain*.

By *Peregrine Rivers* ſtudent in  
the Mathematicks.

¶ Printed by THOMAS BUCK,  
one of the Printers to the Uni-  
verſitie of *Cambridge*.

And are to be ſold by *William Harris*, in  
*Colemanſtreet* in *London*.

✓

The *Julian*, or  
*English* account.

1640.

The *Gregorian*  
*Romane* account.

## The beginning and ending of the Terms.

*Hilary* { The first of *Hilary* term shall be  
On *January* the twentie three:  
And on the twelfth of *February*  
This term doth end most certainly. } Term

*Easter* { And *Easter* term from *Easter* day,  
The Wednesday fortnight 'gins alway:  
And when th' *Ascension* day is past,  
Till Munday next this term doth last. } Term

*Trinity* { On Friday after *Trinitie*  
This term begins assuredly:  
And, as our Lavvyers all do write,  
It ends the Wednesday fortnight. } Term

*Mich.* { If *Michaelmasse* term you seek to finde,  
The ninth of *October* bear in minde:  
It ends, as I do well remember,  
The twentie eighth day of *November*. } Term

Short lines Terms commence end-  
be the of and -ing  
Long times cares, turmoils, spend-

A note of the times forbidding marriage.

When Advent-sunday cometh, Marriage is forbidden untill the 13 of January.

Then at Septuagesima (February 2) it is forbidden untill Low-sunday.

And at Rogation (May 10) it again goeth out: But at Trinitie-sunday it cometh in again, and is not out till Advent.

THE

Anatomic of Mans body, as the parts thereof are by Astrologers attributed unto the twelve signes of the Zodiack.

✓ Head and face.

♈ Neck and throat.  
♊ Breast stomach, & ribs  
♋ Bowels and belly.  
♌ Secret members.  
♍ Knees.

♊ Arms and shoulders.  
♋ Heart and back.  
♌ Reines and loyns.  
♍ Thighs.  
♎ Legs.

✕ The feet.

## Of yeares, moneths, weeks, and dayes.

**T**he Julian yeare begins the first of January  
**T**he Gregorian begins the 22 of our Decem.  
**T**he church of England, in law-cases, March 25 and com  
**T**he yeare of the Kings reigne, March 27 > taineth  
**T**he state of Florence, Sienes, and Pisa, March 25 365  
**T**he Empire (as the Julian) the first of January Dayes  
**T**he church of Rome on their 25 of December  
**T**he Egyptians and Persians the 18 of our July  
**T**he Arabians, and most people of Asia, September 13  
**T**he Hebrews, Greeks, Sarazens, & Turks, 12 moneths Luna  
**T**he Tropicall (or true Solar yeare) beginneth at the Ver  
 nall equinor, and contains 365 dayes, 5 houres, 50 min  
**T**he Sydereall or Starry yeare, beginneth when the sun  
 with the first starre of Aries, of 365 dayes, 6 hour. 6 min  
 Of moneths.

The moneth { Solar, is the continuance of the sunne in one signe.  
 Of Apparition, is 28 dayes, or foure weeks.  
 Of Peragratiō, is 27 dayes and 8 houres.  
 Of Consecutiō, is from new moon to new moon.  
 For use of money, is according to the kalender.  
 Of a week.

**A** week hath the name in Latine Septimana, or seven  
 mornings; yet we commonly call it seven nights; or  
 brief, a sentight.

**The** week beginneth on sunday morning, saturday  
 midnight being past; so that our sunday is the first day  
 the week, called Dies Dominicus, The Lords day.

### Of a day.

**A** day artificiall is the time betwixt sunne-rising and  
 sunne-setting; and the night, from sunne-set to sun-rise.

**A** day naturall is the time of 24 houres: the beginning  
 whereof with us in England, & the Romanes, is at midnight.

**The** Athenians at sunne-setting. The Babylonians  
 sunne-rising. The Umbrians and Astronomers at noon.

Sun in Capr.

Ember week

Ordination  
of Ministers

A description of the foure Quarters of  
this present Yeare 1640.

*Winter Quarter.*

The Winter Quarter (according to the motion of the  
sunne) began the 12 day of *December*, in the last yeare,  
1639: at which time the sunne entred into the first  
house of *Capricorn*, he being then in his greatest south de-  
clination from the equinoctiall line, *viz.* 23 degrees and a  
half: being also then 47 degrees more southerly from us,  
he will be the 11 day of *June* next ensuing: by reason  
whereof, the dayes artificiall, *viz.* from sunne-rising to sun-  
setting, with us will then be at the longest, which now are  
the shortest. And of what length our night now is, of  
the same length shall our day then be; that is, to us at *Cam-*  
*bridge* 16 houres and 34 minutes. And to those at *Eden-*  
*burgh* in *Scotland*, the same day is seventeen houres, and  
three fourth parts of an houre, *viz.* 17 houres and 40 min.  
This quarter continueth untill the tenth day of *March*;  
the sunne, during this time, having his naturall motion in  
passing through these three signes, *Capricorn*, *Aquarius*,  
and *Pisces*.

In the which time, continuing the space of 89 dayes, 56  
minutes, the length of the day with us will be increased  
to 16 houres 34 minutes: and to the 11 of *June*, 9 houres 8 mi-  
nutes: which (by an equall division of this quarter) giveth  
every 22 dayes and a quarter, the dayes increase to be  
one houre, which the vulgar people account 15 dayes to one  
yeare. But (by reason of the obliquitie of the ecliptique,  
and the motion of the sunne, and chiefly the great obliquitie of  
the whole spheare, in this our latitude of 52 degrees and 17  
minutes)

## Rivers 1640.

minutes) the increase of the length of the dayes is as loweth, *viz.*

From the 11 of *December* to the 15 of *January*, containing 34 dayes, the day is increased one houre.

From the 15 of *January* to the 2 of *February*, containing 18 dayes, the day is increased one houre.

From the 2 of *February* to the 17, containing 15 dayes, the day is increased one houre.

From the 17 of *February* to the 3 of *March*, containing 14 dayes, the day is increased one houre.

From the third of *March* to the 19, containing 16 dayes, the dayes increase one houre.

From the 19 of *March* to the 3 of *April*, containing 14 dayes, the dayes increase one houre.

From the third of *April* to the 19, containing 16 dayes, the dayes increase one houre.

From the 19 of *April* to the 7 of *May*, containing 18 dayes, the dayes increase one houre.

And from the 7 of *May* to the 8 of *June*, containing 31 dayes, the dayes increase one houre. Whatsoever further you desire for the length of every day, with the time of Sun-rise and set, you shall find in the Kalender without respect of the refraction of the Sunne, which is different both for time and place: therefore here I willingly omit it.

## Spring Quarter.

**T**He tenth day of *March* the Sunne entreth into the point of the *Ecliptique*, being the same point where it crosseth the *Equator*, then making 12 houres day, and 12 houres night throughout the world. And this time is counted to be the beginning of our *Spring*; from which time untill the 13 of *September*, the dayes are longer then the nights: yet this quarter continueth no longer then the dayes are increasing in length, *viz.* untill the 11 day of *June*. This quarter continueth the time of the sunnes progression through

## Rivers 1640.

These three signes, viz. *Aries*, *Taurus*, and *Gemini*,  
containing the space of 92 dayes, 3 houres, and 59 minutes;  
this is foure dayes, three houres, and three minutes longer  
then the Winter quarter.

## Summer Quarter.

The eleventh day of *June*, the Sunne entreth into the  
first solstitiall point of *Cancer*, beginning then our  
summer, causing then the fruits of the earth to grow to  
their ripening. And this is to all those that inhabit  
the North-side of the equinoctiall line, their longest  
day; and to all on the South-side, their shortest

This quarter continueth untill the 13 day of *September*,  
at which time, the sunne declineth towards the Equa-  
tor, which is the time of the sunnes period through these  
signes, *Cancer*, *Leo*, and *Virgo*, containing the space  
of 92 dayes, 14 houres, and 25 minutes; which is foure  
dayes, 13 houres, and 29 minutes longer then the Winter  
quarter, and 10 houres 16 minutes longer then the Spring  
quarter.

## Autummal quarter.

The 13 day of *September*, the sunne entreth into the  
autummall equinoctiall point, making again the day  
and night artificiall both of one length.

This quarter continueth untill the 11 day of *Decem-*  
ber, the sunne declining to his southern tropique; in  
this time, containing 89 dayes, 10 houres, 56 min.  
utes, the sunne passeth through *Libra*, *Scorpio*, and *Sagittarius*.

*Rivers 1640.*

*The use of those numbers in the sixth column  
or space in this Almanack, in every moneth  
of this year 1640.*

**I**N the sixth columnne ( or space ) in every moneth in  
Almanack you shall find the houre and minute of  
sunnes-setting for every day. The use is thus : Double  
houres and minutes of the sunnes-setting, and you have  
length of the same day. Again, take the houres and mi-  
of the sunnes-setting out of twelve houres , and that  
remaineth is the time of sunne-rising : which being dou-  
is the length of the same night.

So have you  $\left\{ \begin{array}{l} \text{The length of the day} \\ \text{The length of the night} \\ \text{The time of Sunne-rise} \\ \text{The time of Sunne-set} \end{array} \right\} \begin{array}{l} \text{every day} \\ \text{every day} \\ \text{every day} \\ \text{every day} \end{array}$  year.

Observe this plain and generall rule,

As  $\left\{ \begin{array}{l} \text{many minutes the Sun} \end{array} \right\} \begin{array}{l} \text{riseth before } 4, 5, 6, 7, \\ \text{setteth after } 8, 7, 6, 5, \end{array}$

And so on the contrarie: for

As  $\left\{ \begin{array}{l} \text{many minutes the Sun} \end{array} \right\} \begin{array}{l} \text{setteth after } 3, 4, 5, 6, \\ \text{riseth before } 9, 8, 7, 6, \end{array}$

which two numbers of Sun-rise, and Sun-set, make 12

When the day is | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 | houres long

The night is | 16 | 15 | 14 | 13 | 12 | 11 | 10 | 9 | 8 | houres long

And so contrarie: for the length of day and night make  
houres.

Concerning the minutes, remember this alwayes, that

Threescore } one houre.  
Fourtie five } three quarters.  
Fourtie } minutes do make } two third parts.  
Thirtie } half an houre.  
Twentie } one third part.  
Fifteen } one quarter.

These are so plain that example needeth not.

## Of elections medicinall.

The bodie of Man is daily subject to diseases and infirmities, and requireth great care and diligence to be had in conserving and keeping the health thereof. Therefore I set down these principall rules for Bleeding, Purging, Bathing, and Sweating; wishing they may be used as necessarilie requireth: especially, upon such dayes as ( according to severall administrations) are noted in these rules of election followings:

Bleeding Purging Bathing Sweating	}	consider if you minister	}	To keep health. To cure diseases.
--	---	--------------------------	---	--------------------------------------

First, if to keep the body in health, then

4 things, the bodie for these	{	1 Age	Youth. Mans-state. Age. Decrepit-age.	{	3 Con stitution	{	Grosnesse. Leannesse. Spring best. Harvest in- different.	
		2 Com- pletion	Hot and drie.				4 Time of the yeare.	Summer too hot. win. too cold
			Hot & moist					
			Cold & dry.					
			Cold & moist					

4 ages	{	12	to	24	the	in the	{	1 2 3 4 quarter	{	Sanguine, in ♀. Cholerick, in ☿ Flegmatick, ♀ ♄. Melancholy, ♀ ♃.	
		24		36						48	60
		36		48						60	
		48		60							

The bodie very grosse, or very lean, bleed not.

### ¶ To order the Bodie before bleeding.

Preparative to direct the humours, (by the counsel of a Physician) ought to be received three times at the least ere a vein be opened: but if time do not permit this, then ether would be used the night before: and then open a vein in the morning fasting, an houre or two after sunning, and draw such a quantitie as shall be thought fit by a skilfull Physician.

## Rivers 1640.

Respect also must be had to these quantities of blood according to the complexions of the Patients, viz.

Those that are	}	Melancholick Sanguine Cholerick Phlegmatick	}	may bleed	}	most of all, lesse then they lesser. least of all.
-------------------	---	--	---	-----------	---	---

After bleeding may be permitted a draught of claret wine with a tosse: and use meats of a light digestion untill the third day; during which time,

Refrain from	}	Riding Leaping Wrestling Tennis Bathing	}	and	}	Running. Vaulting. Fencing. Bowling. Venus.
--------------	---	---	---	-----	---	---

### ¶ To order the body that shall purge.

Let the Patient receive a preparative (according as the nature of the humours to be purged shall require) three, four or five dayes before he purge: and not walk into the aire on the day of purging, untill the medicine have wrought full operation.

### ¶ To order the body after purging.

This is left to the skilfull opinion of him that manageth; for sometimes the body falleth into a strange Symptom; therefore the Physician ought not to be absent, till he be sure that all dangers are past.

### ¶ Of Bathing.

The moon in { *Libra*, or *Pisces*, bath for cleanness  
                          { *Aries*, *Leo*, or *Sagit.* bath grosse bodie  
                          { *Cancer*, *Scorpio*, or *Pisces*, bath drie bodie

After bathing drie the body with hot clothes, and lie in a bed with clean sheets an houre or two.

### ¶ Of Sweating.

Use the same order as in bathing, &c.

## Rivers 1640.

Secondly, if the bodie require medicine to cure diseases  
consider these rules following, viz.

In the bodie, the { Age  
Complexion } of the sick patient.  
Strength }

In the disease, the { Beginning  
Augmentation } either { Univerfall.  
State present } Particular.  
Declination }

Consider the { Nature of the disease to be cured.  
Qualitie of the medicine that cureth.  
Operation manuell and externall.  
Ministration medicinall and internall.

These and such like duly observed, then proceed accord-  
to art; as time will permit, the disease require, and the  
pendure,

waiting for the chosen { Moneths } least delay cause  
Dayes } further perill.  
Houres }

wayes remembring that you give no purging medicine  
in the Moon is in *Leo*: nor open a vein, or make incision,  
in the Moon is in the signe that ruleth over that member  
ere that operation is to be done.

## Elections of Husbandrie.

Plant & graft the Moon increasing in *Taurus*, or *Aquar*.

Fell Timber from Lammas till Christmas, & increasing.

Coppice and Fewel, the Moon in the first Quarter.

your vines, in *February*, or *March*.

and cattell, the Moon in *Aries*, *Sagittarius*, or *Capricorn*.

move trees, the Moon in the last Quarter of *November*.

for Sheep, and cut hair, the Moon increasing.

for fruit, Herbs, and Flowers, at the full Moon.

when the wind being East or North-east, it is not good to plant,

nor cut any trees or plants, whereof you expect any

A plain description of the High-ways in  
*England and Wales*, now the second time  
 enlarged, in a more perfect manner then  
 heretofore hath been published, with the  
 use of the same by example, *viz.*

From *Cambridge* to *London* 44 miles,  
 thus accounted:

From *Cambridge* to *Fulmire* 6 miles, from *Fulmire*  
*Barkway* 6 miles, from *Barkway* to *Puckridge* 7 miles  
 from *Puckridge* to *Ware* 5 miles, from *Ware* to *Waltham*  
 miles, from *Waltham* to *London* 12 miles. And the new  
 numbers do shew how farre it is from any of those towns  
 (by the way) to *London*. As from *Fulmire* to *London*  
 miles, from *Barkway* 32, from *Puckridge* 25, from *Ware*  
 20, and from *Waltham* 12 miles. The same order holdeth  
 throughout these tables.
